# INFORM

OUR SOLUTIONS

INFORM develops software solutions for a wide range of industries. These are precisely tailored to the specific needs of users and their operational environments. We solve the complex challenges our customers face every day. We also increasingly offer cloud-based solutions that give our clients easy access to AI technologies.

SMART PROCESSES, SMARTER DECISIONS

DECISION INTELLI-GENCE FOR COMPLEX PROCESSES

For over 50 years, **INFORM** has been developing software with decision intelligence that efficiently controls complex operational processes. By using artificial intelligence and powerful algorithms, we enable well-founded decisions in real time - in industry, logistics, aviation, finance and more. Our goal: to digitally manage the unplannable - reliably, flexibly and with foresight.

INFORM

SOFTWARE POWERED BY DECISION INTELLIGENCE

YOUR BENEFITS AT A GLANCE

» More efficient processes
» Faster, well-informed decisions
» Stronger resilience and faster reaction to disruptions
» Easy-to-use cloud-based technologies
» Safe and transparent use of AI

WHO WE ARE

Innovation drives us. Since our founding in 1969, **INFORM** has grown steadily, entered new markets, and invested consistently in research and development. Today, we are a team of over 1,000 professionals from more then 35 countries - software engineers, data analysts, and consultants - supporting more than 1,000 active customers worldwide. With our decision intelligence software, businesses increase efficiency and make better decisions.

RESPONSIBLE USE OF AI

People are at the heart of everything we do. AI is meant to assist, not replace. That's why we ensure that users always retain control and responsibility. Transparency and trust are essential values for us.

SUSTAINABILITY AT INFORM

Sustainability is not just a goal - it's the foundation of our actions. With our intelligent software solutions, we help companies around the world work more efficiently while aligning economic, social, and environmental responsibilities.
