## Software Developer Integration Tests (all genders)

### What you can move with us:

- Together with your colleagues, you will optimally implement our customer projects and continuously develop our Java and web-based software.
- Your tasks include the conception, creation and implementation of a holistic, integrative test framework for our software product using mocks and simulators.
- Iteratively, you will take care of bug analysis and bug fixing planning.
- As a member of a friendly and agile team you will also be involved in the planning of upcoming and ongoing customer projects (milestones, releases).

### What you bring along:

- A degree in the field of computer science, software engineering or similar
- Sound knowledge of Kotlin/Java, Lambdas, Spring and Spring Boot, Hibernate, SQL, JUnit, React and others
- Experience with tools like Jira, Maven, Git/GitLab, Jenkins, Citrus Framework and others is advantageous
- Passionate about and enjoying software development
- High degree of self-motivation and willingness to learn
- Good knowledge of English
