## Software Developer Java/Kotlin (all genders)

### What you can move with us:

- Together with your colleagues in a cross-functional team, you will optimally implement our customer projects and continuously develop our Java/Kotlin and web-based software products, e.g., in the area of business intelligence.
- Your tasks include requirements analysis, discussing and deciding software design, full-stack implementation (business logic, database model, interfaces, user interfaces), testing, documenting.
- Together with your agile development team you will find and develop technical solutions for customer requirements based on the latest technologies and thus create "smart" software.
- As a member of a friendly and agile team you will also be involved in the planning of upcoming and ongoing customer projects (milestones, releases).

### What you bring along:

- A degree in the field of computer science, software engineering or similar and several years of experience. Profound knowledge of relevant programming languages and frameworks (e.g., flutter, Dart, React, Typescript)
- Sound knowledge of Kotlin or Java, Spring and Spring Boot or similar, Maven, JPA, SQL, JUnit, Angular or similar, Git
- Experience with Jira, GitLab, CI/CD (e.g., Gitlab-CI), JMS or messaging in general, GraphQL, REST, Cucumber or similar, AWS Cloud experience is of advantage
- Being passionate about software development and software design/architecture and enjoying software development.
- High degree of self-motivation and willingness to learn
- Good knowledge of English
