

NEWS from the RiskShield Cosmos

Dear Tyrone,

Fraud prevention is becoming more connected, more accountable, and more dynamic.

In this edition, we explore what that means from three different angles: the growing need for network-wide intelligence, the rising importance of transparency in AI-supported decisions, and the broader regulatory and market developments shaping payments today.

Together, these topics reflect a shift many institutions are already experiencing: from isolated responses toward more collaborative, explainable, and future-ready approaches.

Enjoy the read.

On-Demand Webinar: Rethinking Fraud Prevention Beyond One Institution

As payment ecosystems become more connected, fraud is no longer confined to a single institution. That is exactly what we explored in our recent webinar on Network Intelligence together with experts from EBA Clearing, CREDEM, and INFORM. The discussion looked at how financial institutions can spot cross-bank fraud patterns earlier, reduce blind spots, and strengthen fraud prevention with a broader view across payment networks. Curious what that means in practice? Request a view of the [on-demand webinar here](#).

Blog: Opening the AI Black Box

As AI becomes more deeply embedded in critical decision-making, transparency is moving into focus. In our latest blog post, we look at what explainable AI really means, how it works, and why it is becoming increasingly important for trustworthy and responsible use of AI. From fraud detection to risk assessment, explainability helps turn complex model outputs into insights people can understand and act on. Discover more [in the full article](#).

Where to meet us next: Qube's NextGen Payments & RegTech Forum

Emerging trends such as real-time payments and digital identities are evolving the payments landscape quickly, and so is the regulatory agenda around it. That is why we are heading to the NextGen Payments & RegTech Forum in Barcelona on May 7, 2026 to discuss with industry leaders how the region is looking at these developments, what the challenges are and how we can help with our expertise. INFORM will be on site to join the exchange and connect with peers from across the ecosystem. If you will be there too, let's meet in person. [More details here](#).
