JavaScript Developer – Web and Mobile Development (all genders)

What you can move with us:

- You develop the mobile / JavaScript / hybrid stack of an innovative app and its interaction with its SaaS backend.
- You develop new product functionality, closely collaborating with our UX team, product management, and developer colleagues.
- You contribute to the technical design of new features and the development of sustainable development strategies.
- You keep an eye on the quality, scalability and security of the product and contribute to the continuous optimization of development processes.

What you bring along:

- Completed studies or vocational training in computer science, software engineering or similar
- Profound knowledge in JavaScript, TypeScript, HTML and CSS
- Professional work experience with frontend frameworks such as Angular, React, Vue or similar Experience with fullstack JavaScript development (e. g. Node.js, GraphQL, REST)
- At least first experience with mobile and/or hybrid application development
- Very good written and verbal communication skills in English
- Interest in working in a self-organized, agile environment
